Profile Summary:

Sayed Asif Zayed, a recent graduate with a background in Computer Science and Engineering, is seeking employment in a challenging environment. With excellent time management skills, creativity, and a positive attitude, I have experience working both independently and in a team.

Career Objectives:

Recently graduated, I am passionate about web development and have a CSE background. I am a creative thinker, quick learner, and problem solver, adapting easily to any situation. I aim to utilize my skills in this field, and my excellent communication skills enable effective teamwork.

EXPERIENCE:

I recently graduated. That's because I don't have any job experience or internships anyway.

Subject : Science
CGPA : 5.00 (out of 5)
Passing Year : 2016

PROJECTS:

→ Full-Stack website — Amader School [Live Link](#) | [Client Side](#) | [Server Side](#)

- School Management System.
- Contain four levels of users (super admin, Admin, Teacher, and Student)
- Integrated CRUD operation.
- My clients will be different schools that have bought subscriptions.
- The subscriber school utilizes the database for administrative tasks.
- Admins create teacher accounts, and teachers create student accounts for student's login.
- Routine generation and attendance system.
- The teacher can publish results, add events, see student details, and take attendance of his advised students.
- Admins add notices, add or remove teachers, and set routines for teachers.
- Students can see the class routine, marks, and monthly attendance stats, update their profile, and see events and notices.
- Implement own database-matched login system and validate users with JWT (JSON web token).

Tools: ReactJs, Tailwind CSS, DaisyUI, Firebase, Vercel, MongoDB, JWT, Nodejs, Expressjs, Mongoose, imgBB

→ Full Stack website — phones.Com [Live Link](#) | [Client Side](#) | [Server Side](#)

- Buy or Sell used mobile phones/tablets/iPads category-wise at the best prices.
- Three types of roles are present on this website(Admin, Seller, and Buyer.
- Admins can view, delete, and create sellers/buyers.
- Integrated CRUD operations.
- Sellers display product details; buyers choose based on needs.
- Responsive website (mobile and desktop).
- Enabled email and password authentication and Google authentication.
- Use the JWT token to verify users and protect routes from unauthorized access.

Tools: ReactJs, Tailwind CSS, DaisyUI, Firebase, Vercel, MongoDB, NodeJS, ExpressJS, imgBB

→ Full Stack website — Service Reviews [Live Link](#) | [Client Side](#) | [Server Side](#)

- Users can see the website owner's service areas and post reviews.
- By clicking on services, you go through the individual service route.
- Users can review the particular service area and see their reviews on those service route pages, and the reviews are sorted by the latest reviews.
- The latest reviews show up on the home page.
- Users can also add service areas.
- Responsive website (mobile and desktop).

- Enabled email and password authentication, Google, and GitHub authentication.

Tools: ReactJs, tailwind CSS, tailwind element, Firebase, Vercel, MongoDB, NodeJS, Express js.
