Projects

Full Stack Website ⟶ Used products resale market   Live Site │ Client Side │ Server Side

- Buy or Sell used mobile phones/tablets/ipads category-wise at the best prices.
- Three types of roles are present on this website(Admin, Seller, Buyer).
- Admin can see all the sellers & buyers, can delete any user and can make admin whatever he/she wants.
- Integrated CRUD operations.
- Sellers can add products for sale and see his/her product details, buyer can buy a product according to his/her needs.
- Responsive website(Mobile & Desktop).
- Enabled email and password authentication and google authentication.
- Use JWT token to verify users and protect route from unauthorised access.

Tools: ReactJs, tailwindCSS, daisyUI, Firebase, Vercel, MongoDB, JWT

Full Stack Website ⟶ Learning Platform   Live Site │ Client Side │ Server Side

- Users can buy his/her desired courses.
- In NavBar users can see their photos and Gmail.
- Enabled email and password authentication, google and GitHub authentication.
- Users can see the selected courses which he/she want to buy at the cart route.
- Users can see courses category-wise.
- Responsive website(Mobile & Desktop).

Tools: ReactJs, tailwindCSS, daisyUI, Firebase, Vercel, MongoDB

Full Stack Website ⟶ Service Reviews website   Live Site │ Client Side │ Server Side

- Users can see the website owner's service areas.
- By clicking on services go through the individual service route.
- Users can review the particular service area and see their reviews on those service route pages and the reviews sort by the latest reviews.
- Most latest reviews show on the home page.
- Users can also add service areas.
- Responsive website(Mobile & Desktop).
- Enabled email and password authentication, google, and GitHub authentication.

Tools: ReactJs, tailwindCSS, tailwind element, Firebase, Vercel, MongoDB
